

STEVE HOWELL

EXOPLANETS AND KEPLER MISSION UPDATE

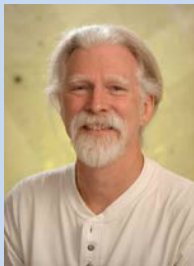

July 7th, 2015

Science and Technology Building, Room 108

University of Hawai'i - Hilo

7:00 pm

About the Speaker:

Dr. Howell serves as the project scientist on the Kepler Mission Science Team. During his presentation he will give an update on this groundbreaking space telescope mission with recent results on exoplanets and the implications for life in the universe. Dr. Howell serves on numerous review panels and was most recently a member of the National Academy of Sciences panel on NASA's Constellation system. Dr. Howell worked with NASA

Headquarters to help establish the Kepler guest observer office at NASA / Ames research center and now works at NASA Ames Research Center in California.
